BELZONA 1221

1. PRODUCT NAME
Belzona® 1221
(Super E-Metal)
A rapidly solidifying repair system for emergency and permanent bonding, repairing or rebuilding of all ferrous and non-ferrous metals.

2. MANUFACTURER
Belzona Inc.,
2000 N.W. 88th Court
Miami, Florida 33172

Belzona Polymerics Ltd.,
Claro Road, Harrogate,
HG1 4DS, England.

3. PRODUCT DESCRIPTION
A two component system consisting of a base and solidifier is packaged in sealed sachets. The product is based on a silicon steel alloy blended within high molecular weight polymers and oligomers. Developed for high speed emergency repairs it is ideally suited for application to: Leaking pipes Leaking tanks Scored hydraulic rams Stripped threads Plastic/metal joints Holed casings Bearing seats Battery terminal posts Broken insulators Ducts

4. TECHNICAL DATA

<table>
<thead>
<tr>

- **Gel strength at 77°F (25°C):**
  - Base: 100 - 300 g/cm
  - Solidifier: 50 - 150 g/cm
- **Density:**
  - Base: 2.20 - 2.40 g/cm³
  - Solidifier: 1.10 - 1.30 g/cm³

**Mixed Properties**
- **Mixing Ratio by Weight:** Base : Solidifier = 2 : 1
- **Mixing Ratio by Volume:** Base : Solidifier = 1 : 1
- **Mixed Density:** 1.70 - 1.90 g/cm³

**Shelf Life:**
Unopened sachets stored between 32°F (0°C) and 86°F (30°C) are expected to have a 5 year shelf life. Once opened, material shelf life will be several weeks.

**Working Life:**
Will vary according to temperature. At 77°F (25°C) use all mixed material within 3 minutes.

**Volume Capacity:**
The volume capacity for the material is 33.5 cu.in (550 cm³) per kg. The unit size is 125g.

**Cure Time:**
Will be reduced for thicker sections and extended for thinner applications. At a thickness of approximately ¼ in. (6 mm), allow to solidify for the times shown in the chart below before subjecting it to the conditions indicated.

5. PHYSICAL / MECHANICAL PROPERTIES

**Adhesion:**
- **Tensile Shear:**
The tensile shear adhesion to a grit blasted substrate with a 3 - 4 mil. profile, when tested to ASTM D1002 after 7 days cure at 77°F (25°C), is typically:
  - Mild steel: 2500 psi (175 kgs/cm²)
  - Copper: 1800 psi (126 kgs/cm²)
  - Aluminum: 1500 psi (105 kgs/cm²)

**Pull Off Adhesion:**
When tested in accordance with ASTM D 4541/ ISO 4624, the pull off strength from grit blasted steel will be typically: 1500 psi (105 kg/cm²) ambient cure

**Chemical Resistance:**
The material when allowed to cure for 7 days at 77°F (25°C) prior to immersion, will offer excellent resistance to the following chemicals:

**ACIDS**
- 10% hydrochloric
- 20% Sulfuric
- 10% Nitric
- 10% Phosphoric
- 10% Acetic
- 10% Lactic

**BASES**
- 40% Sodium hydroxide

**OTHERS**
- Diethanolamine
- Sodium hypochlorite (bleach)
- Kerosene
- Gasoline
- 37% Formalin

For specific chemical resistance data please refer to product data M506.
• **Compressive Strength:**
The compressive strength of the material, when tested to ASTM D695 after 7 days cure at 77°F (25°C), is typically 8100 psi (570 kgs/cm²).

• **Corrosion Resistance:**
When fully cured, the material will show no visible signs of corrosion after 5,000 hours exposure in the ASTM B117-73 salt spray cabinet.

• **Electrical Properties:**
- **Dielectric Strength**
  218 volts/mil (8720 volts/mm)
  
  - Dielectric Constant
    - at 1000 HZ: 4
    - at 1 MHz: 4
  
  - Dissipation Factor
    - at 1000 Hz: < 0.0005
    - at 1 MHz: < 0.0005
  
  - Volume Resistivity
    - (ohm cm): $6.3 \times 10^{15}$
  
  - Surface Resistivity
    - (ohms): $1.5 \times 10^{15}$

• **Flexural Strength:**
The flexural strength of the material, when tested to ASTM D790 after 7 days at 77°F (25°C), is typically 8600 psi (605 kgs/cm²).

• **Heat Resistance:**
For many typical applications, the product is thermally stable to 302°F (150°C) dry and 140°F (60°C) wet.

• **Hardness:**
The hardness of the material when tested to ASTM D2240 after 7 days cure at 77°F (25°C), is typically 80 Shore D.

• **Thermal Expansion:**
Tested to ASTM E228 the coefficient of thermal expansion is typically 81.5 ppm/°C.

• **Water Uptake:**
When tested for 3 days at 77°F (25°C) water uptake is typically 1%.

6. **SURFACE PREPARATION AND APPLICATION PROCEDURES**
For proper technique, refer to the Belzona Instructions for Use leaflet which is enclosed with each packaged product.

7. **AVAILABILITY AND COST**
Belzona® 1221 is available from a network of Belzona® Distributors throughout the world for prompt delivery to the application site. For information, consult the Belzona® Distributor in your area.

8. **WARRANTY**
Belzona® guarantees this product will meet the performance claims stated herein when material is stored and used as instructed in the Belzona® Instructions for Use leaflet. Belzona® further guarantees that all its products are carefully manufactured to ensure the highest quality possible and tested strictly in accordance with universally recognised standards (ASTM, ANSI, BS, DIN, etc.). Since Belzona® has no control over the use of the product described herein, no warranty for any application can be given.

9. **TECHNICAL SERVICES**
Complete technical assistance is available and includes fully trained Technical Consultants, technical service personnel and fully staffed research, development and quality control laboratories.

10. **HEALTH AND SAFETY**
Prior to using this material, please consult the relevant Material Safety Data Sheets.
